

**DNA Matches separating Jacob Gro/Crow b 1722 Richhill Twn, Greene Co, PA from various other Crow/e families in VA/WV, MD, PA, KY and OH.**

There is lot of confusion and misinformation about the Jacob Gro/Crow family and the various other Crow/e families from Virginia/West Virginia, Pennsylvania & Maryland being related.

We have proved by DNA that the Jacob Gro/Crow family does not match the other families. We have 13 families that match each other that I would like to post to maybe correct some of the misinformation. I have asked for permission to post the testers names and the ones who didn't respond, I used "private" for their name.

The DNA tester can ask for a 12, 25, 37 or 67 marker test. The more markers that match the more closely related the testers are. There are, however, "mutated" markers that can show up along the way making the genetic difference.

The test is on the y chromosome from a direct male descendant. FamilyTree DNA.com uses the father of the tester as the 1st generation.

We have a lot more info on the families we match if anyone is interested.

Doris Crowe Greaves

From Carol

I am a direct descendant of William Frederick Crow b. abt 1773 colonial Maryland and Mary Humbertson. This I can provide documentation for. I have spent 7 years looking for a link of my ancestors to Georg Philip Groh. As to date I have only seen one record for this person and that is the passengers list for

the Ship Two Brothers arrival date Oct. 13, 1747. There were no wife and children listed for any of the male passengers 16 and over. I am sure this person sailed on the ship but I have not located any Naturalization documents for this person. Please could one researcher share with all of us where the additional information for the names of his sons and wife were found. Thank you.
